

Table X. Perchlorate concentrations in fillets from aquatic organisms within the Lake Waco and Lake Belton watersheds. Perchlorate concentrations are in ng/g (ppb) expressed based on tissue wet weight. Data represent the results of analyses of individual tissues, with the number of samples of species indicated parenthetically. Samples were collected in February, 2002.

Perchlorate (ng/g)	
Lake Waco	
Site 1 (Near Mouth of Bosque River)	
Largemouth Bass (10)	ND
	ND
	ND
